

Aribell
The Leader in Door & Window Components

NEW! **LOW WICK** Weatherstrip

Two SIGNIFICANT IMPROVEMENTS:

- **Thicker profile** = more contact with door for a tighter seal.
- **Low Wick Foam** = better performance.

Aribell's *New*

AB-Q-LW683

replaces the previous PE650, and is better given its slightly longer reach.
Pricing is the same.

Reach:
683" (17 34mm)

Reach:
.650" (16.5mm)

Low Wick AB-Q-LW683

Traditional .650" reach

- ▶ New design increases contact with the door panel face eliminating air and water infiltration when subjected to high air pressure;
- ▶ New Low Wick Foam formulation uses a combination of closed-cell and open-cell structure;
- ▶ Low Wick Foam absorbs 50% less water;
- ▶ As moisture wicks into foam, its travel and subsequent volume is limited once it contacts the closed cells. This is especially important in cold Canadian climates where the weather stripping can freeze when saturated.
