

ABTR-CFR-W

Door & Jamb Corner Spacer/Retainer (white)

- Provides cost savings over all existing techniques or products.
- Helps hold the door shut during shipping.
- Keeps the door from racking.
- Provides separation to prevent the hinges from damaging other doors during shipping.
- Gives the corner joint additional support.

Staple to the bottom of the door and the side of the jamb.

A diagram of a yellow door with four rectangular panels. At each of the four corners, a white corner spacer/retainer is shown being installed. Curved arrows point from the spacers in the circular inset and the 3D diagram to their respective locations on the door.
