The Leader in Door & Window Components

No Wick Closed Cell **Weather-stripping**

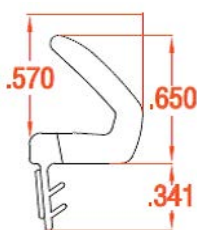

Innovative seal technology for entry doors

- The EPDM sponge material is **closed cell and will not absorb or wick water**.
- Stable in high and low temperatures -offers excellent compression properties.
- Continuous seal between all sides of the door: header, hinge, and strike side.
- The low friction surface provides protection against abrasion.
- Excellent weather, ozone and UV resistance.
- Constructed of closed cell EPDM sponge with a rigid polypropylene support for easy kerf insertion.
- **Continuous wrapping around corners provides superior protection against air or water infiltration - (standard reach).**
- Tested and passes up to DP 55 for 2010 Canadian Building Standard and 2011 NAFS.

170' rolls in White; Black or Beige. 650 reach (Part #'s: AB-3287WT170; AB-3287BL170; AB-3287BE170).

170' rolls in Black 825 reach (Part #'s: AB-3229BL170)

Standard reach 650

Extended reach 825
