

Vinyl Wrapped Jambs

Maintenance Free product - protects wood jambs from the exterior elements.

Cost effective - reduce labour time and money by cutting and assembling only one product, (vs. wood plus cladding).

Features:

- ▶ Smooth & Ticked White are **pre-finished** and UV stabilized - no need to ever paint.
- ▶ To ensure quality, **Eastern White Pine** is generally used for wrapping.
- ▶ Able to withstand extreme climate changes (temperatures from -30 to 100 C°).
- ▶ **Vinyl is permanently fused to wood substrate - keeps wood dry and prevents warping, wicking and rotting. Wrapped jambs are guaranteed against delamination.**
- ▶ Vinyl wrap will not wave like cladding when exposed to temperature changes.
- ▶ Complete Protection - Interior and Exterior sections of jambs are pre-finished with vinyl wrapping.
- ▶ Available in three finishes:
 - Smooth White 141 - matches steel POLYTEX pre-finished white doors.
 - Ticked White 141 - tick feature hides any imperfections in the wood substrate.
 - Stainable Woodgrain White - stain to match any fiberglass door, or paint any colour.
- ▶ Jambs, Brickmould and Burlap are in stock.
- ▶ **Please contact Aribell for availability of other vinyl wrapped profiles.**
