The Leader in Door & Windows Components

RegaLead brings European design influence to the North American market

Combining unique design with proven performance is key to RegaLead's success around the world as a leading supplier of decorative glass for steel, fibreglass and PVC door markets.

RegaLead has been at the forefront of the decorative glass market in the UK for over three decades and has built a network of customers and dealers around the world with over 80 countries now having RegaLead representation. For the North American market, we have developed a range of decorative door lites that brings something a little different to the market, whilst surpassing the requirements of local codes for insulated glass quality, thermal performance and security.

The 2020 Decorative Glass Collection has products to suit all tastes and styles of home, ranging from the very traditional Dorchester leaded glass, through to the show-stopping contemporary designs of Modena and Murano which combine beautifully modern fused glass elements.

The range may be inspired by our European offering, but it is tailored to the requirements of North American manufacturers and the whole range of decorative glass is available in a wide range of sizes designed to suit the unique requirements of the market.

RegaLead are proud and active members of the leading Industry bodies in both the UK and North America and comply with all local code requirements and quality standards.

The entrance to your home is important, as first impressions really do count! We believe that decorative glass makes a statement that reflects your personal taste, style and character. Inspirational, beautiful and the ultimate in style, our decorative glass range has been created to provide you with a wealth of choice to enhance your entrance door and create a first

impression that counts. Using a range of decorative glass techniques from classic comes and bevels, through to the simple elegance of etched glass and our unique Cast Resin system, we are proud to present a range of stunning designs that will suit all tastes, budgets and homes.

LEAD ART

The Lead Art units are manufactured using a truly unique patented technique known as 'Future Units'. The hand-cut Spectrum Glass pieces are bonded to a sheet of tempered glass and then finished with RegaLead adhesive lead. This creates a truly stunning, double glazed insulated glass unit, with the added strength benefits 2 layers of tempered glass.

Dorchester
Page 6

ZINC ART

Our range of Zinc Art designs incorporate beautiful bevels or fused glass tiles against a background of etch-effect glass to create stunning contemporary designs. The glass elements are all hand-cut and outlined with fine zinc comes and then encapsulated inside a high performance insulated glass unit. The two designs we have selected for the Canadian market are truly unique and unlike anything else currently available.

Modena
Page 10

ALU-CAME

Our Alu-Came units are a modern alternative to the more commonly used Zinc Art technique. Made with a combination of weldless, chrome finish, aluminum comes and a range of contemporary patterned glass, offset with hand cut clear glass bevels. The Alu-Came ranges are particularly well suited to contemporary doors and combine beautifully with our Urban frame system.

FUSION ART

Our Fusion glass is manufactured by heating coloured and clear glass together at 1200°F until they start to melt and literally fuse together. Although fusing is one of the oldest decorative glass techniques known, it is the introduction of modern manufacturing equipment and insulated glass technologies that allow this stunning style to now be used effectively in DoorLites.

Symphony
Page 16

CRYSTAL ART

Our Crystal Art panels which are manufactured in our production facility in Scotland, UK offer all the design aesthetics of traditional bevelled glass designs but with 'clear comes'. Not only are these glass panels elegantly designed, they are technologically advanced: The resin technology used in their manufacture adds incredible break through resistance and is 99% UV blocking.

Havana
Page 18

CRYSTAL CAST

The stunningly modern 'slumped' glass textures of our Crystal Cast ranges bring something very different to the market at affordable prices. It is our unique resin casting system that allows us to make perfect replicas of original cast glass and create a finished glass design that is indistinguishable from the original but due to its manufacturing process is incredibly strong.

Serenity
Page 20

Laguna
Page 22

ETCH ART

The contemporary Etch Art designs are a combination of sandblasted glass with beautiful Fused or bevelled glass elements applied on the surface. This creates a stunning a 3D design effect. All our Etch Art units are supplied as double glazed, insulated glass units with the glass elements on the outer surface.

Reflections

This stunning contemporary design incorporates clear, textured and subtle grey glass in a striking design, where light beautifully refracts and reflects off the bevelled edges. The glass choices provide high levels of privacy whilst still allowing light to flood into your home. The design is manufactured using high gloss, black chrome comes.

Modena

A decorative glass first! Combining hand-made fused glass tiles within a traditional manufactured zinc art unit, Modena combines heritage and modernity beautifully. The sweeping curves of the bevelled glass contrast effectively with the linear Chord™ glass and Fusion tiles and are set against an etched glass background.

Frame Options

The RegaLead range of Decorative Door Glass is available in a range of frames manufactured from varying materials and profiles to enhance the glass, with both traditional and contemporary detailing.

Urban Frame

Our latest frame option, manufactured from a hybrid of aluminum and PVC, offers contemporary aesthetics with un-paralleled thermal and security performance. The Urban frame is a unique 3-part system with a slim aluminum external frame combined with a screw together, thermal break, PVC interior. The system is fully deglazeable and has been rigorously tested for security (UK Standard PAS24 and Police Secure by Design Accredited) and weather and air-tightness (AAMA/WDMA/CSA101/I.S.2/A400-08).
